ABOUT ME

A third-year Software Engineering student passionate about game development. I love learning new technologies and building engaging, high-quality gameplay experiences.

EDUCATION

Hanoi University of Industry 🌐, *Software Engineering Year 3 student (Current GPA: 3.4x/4.0)*

TECHNICAL SKILLS

- **Good programming skills:** C#, .NET, OOP, Design Patterns, SOLID.
- **Good experience with:** Unity 3D.
- **Game optimization:** Resource management, Profiling, Frame Debugger, and fundamental optimization concepts.
- **Editor scripting:** Custom Inspectors, Editor Windows, Gizmos, IMGUI/UI Toolkit, Odin.
- **SDKs & Services:** Firebase, Unity IAP, Unity Ads.

EXPERIENCE

Unity Intern (Playable Ads), IEC Games - Winter Wolf 11/2025 – 04/2026

- Designed and developed multiple mini-games from existing games or from scratch.
- Optimized performance for mobile, ensuring smooth gameplay on low-end devices.
- Created and maintained custom level editor tools to support efficient level design (IMGUI/UI Toolkit).

PROJECTS

(For a complete portfolio, please refer to [my-portfolio](#) 🌐)

Food Rush, 3D casual game project (Android) 07/2025 – 08/2025

- Implemented a complete gameplay features: PlayerControls, Interaction, AI NPCs, Map, Skin, Reward, Exchanging, UIs, Scene Navigation,...
- Used patterns: Singleton, ObjectPool, Observer, PubSub, MVC.
- Used packages such as: Addressable, DoTween, UniTask,... and other tools for Editor, Debugging.
- Integrated Firebase (Auth, Database, RemoteConfig, Analytics, Crashlytics), Google OAuth2, Unity Ads (Legacy), and Unity IAP.
- Optimized for mobile, target OPPO A3s - android 8.0 achieve ~60 FPS at lowest game settings.
- Built a simple CI/CD pipeline for Unity using GitHub Actions.
- Successfully published on GooglePlay: [Food Rush on GooglePlay](#). 🌐

Mario Kart, 3D racing game - Mario Kart clone (Windows) 07/2024 – 07/2024

- A clone project created to learn and experiment with new game development concepts.
- Developed a physics-based Kart Controller.
- Used Object Pool pattern, technologies: Input System and LeanTween.
- Implemented MVP pattern for the presentation layer, separating views and gameplay logic.
- Public project: [Mario-Kart-Demo](#). 🌐
